EDUCATION

Shah & Anchor Kutchhi College of Engineering

Chembur, Mumbai, India

BTech in Computer Engineering — SEM 1: 9.39, SEM 2: 8.68, SEM 3: 9.05, SEM 4: 9.55

KJ Somaiya College of Science and Commerce

Vidyavihar, India

Maharashtra Board (Science) — 66.67% JEE: 79% CET: 85%

St. Mary's Malankara High School

SSC (Maharashtra Board) — 75.80%

SKILLS

Languages: C++, Java, Kotlin, JavaScript, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, Firebase

Databases: MongoDB, MySQL, Firebase Firestore

Tools: Git, GitHub, Android Studio, VS Code, Postman, Figma

Core: DSA, OOP, DBMS, Operating Systems, Computer Networks

PROJECTS

IoT Based Smart Air Quality Monitoring & Purification System | Hardware

- Presented an IoT-based smart air quality monitoring and purification system at the Robotics Techno-Connect Competition organized by the University of Mumbai in collaboration with Janyu Technologies.
- Combined a sensor-driven hardware unit for real-time data collection with a software dashboard for live monitoring, analytics, and automated purification control.
- Monitored PM2.5, CO2, temperature, and humidity levels, automatically triggering purification mechanisms when air quality dropped below safe thresholds.

Heat-Mitigation | Web Application

- Developed an IoT-based heat mitigation system monitoring environmental conditions using temperature and humidity sensors.
- Built a responsive web dashboard for real-time data visualization, threshold-based alerts, and historical analytics to help reduce the effects of extreme heat.

BagFix-Pro | Android App

- Built an Android application to help users manage bag repair requests, including submitting repair details, tracking status, and receiving service updates.
- Implemented user authentication, local database management, intuitive UI, and order tracking following Android development best practices using Kotlin and Android Studio.

SiteOps | AI-Powered Construction Management Platform

- Built an AI-powered construction management platform featuring real-time workforce and machinery tracking, project dashboards, and task management for efficient site operations.
- Integrated AI-driven safety monitoring, incident detection, ticket management, and an intelligent assistant to streamline communication and enhance workplace safety.

EVENT MANAGEMENT & LEADERSHIP EXPERIENCE

Core Organizer – TATTVA (Student Project Showcase)

- Managed planning, coordination, and execution of TATTVA, a large-scale student project showcase event, ensuring smooth participation and event flow.

Hackathon Organizer – CREATHON

- Co-managed CREATHON, a college-level hackathon with a \$50,000 prize pool, overseeing registration, promotions, and participant coordination.

University Fair – International Exposure Event

- Played a key role in organizing a University Fair with ~1500 student footfall, hosting delegates from 5 different countries and supporting international collaboration and outreach.

HR Meet 3.0 – Industry Interaction Event

- Assisted in organizing HR Meet 3.0, coordinating sessions and logistics for 50+ HR professionals, strengthening industry-academia engagement.

Hackathon Participant

- Participated in 6+ national and inter-college hackathons, building innovative solutions in domains such as IoT, Web Development, and AI.
